IMPORTANT TO HOUSE-KEEPERS:

DAYTON'S IMPROVED METHOD OF PRESERVING FRUITS, VEGETABLES, &c.

TRESH FRUIT AND VEGETABLES are not merely the greatest luxuries enjoyed by man-kind: they are absolutely essential to the perfection of health, and may be regarded as one of God's best gifts. As, however the season of their pro-duction is brief, it has long been a matter of deep interest to devise some method of preserving them, THE Friends of Maj. ABRAM JONES rein all their freshness, long after their season of ripeness had passed. Various methods have been devised to effect this end, to each of which some serious objection has been laid. It is believed however, that in the apparatus her presented will be found at once the cheapest and most effective method of keeping these and other articles fresh,

DAYTON'S EXHAUSTER. It has long been a desideratum to find some cheap, simple and effictual method of preserving Fruits, Vegetables, &c., so as to keep them fit for domestic use a number of years. The expenso of preserving with sugar is a serious objection. Free access of air causes the decomposition of vegetable matter. It is obvious that if Fruits and vegetables can be kept from contact with air, this effect will not take place. To effect this, the attention has heretofore been directed to some method of scaling the can, while heat alone has been relied upon for driving out the air. This method has been attended with many and serious objections, among which are, the destruction of the fresh flavor of the fruit, caused by so much heating, and the difficulty of seat in the next Legislature at the ensuing election.

We are authorized by the friends of Maj.

A. L. DEARING, to nominate him as a Candidate

Caused by so much heating, and the difficulty of caused by so much heatin its construction and operation that any female can use it; yet so substantial that a single instrument will last a family for many years, and serve to seal up thousands of caus of fruit; while cans can be manufactured by any tinner at a much less expen-e than must be incurred to procure patent cans,

Directions for preparing the Fruit, Vegetables, Butter, Eg2s, &c; and for managing the Can or Jars will be furnished with the Exhauter.

I have made arrangements with Mr. W. II. GOODRICH, of Augusta, owner of the Patent of Dayton's Exhauster for this District, and am now prepared to furnish the EXHAUSTER, together with the Porcelain JARS, manufactured at Kaolin, at as low prices as they can be had in Augusta. III respectfully call the attention of the cit zens of this District to this important invention. G. L. PENN, Agt.
